

ASSEMBLY

FJC010208-1

- Notes:
1. Need center block 1 and 2, one side block, one top plate, and one rubber seal.
 2. Bond center block 1 and 2 together.
Bond should be air-tight and top surface should be flush.
Top surface should be flush.
 3. Drill a 3/32" dia. hole on one side of center block 1
for pressure probe insertion.
 4. Side block will be attached to center blocks by 4 screws and nuts.
 5. Top plate will be attached to center blocks by 4 counter-sunk screws
and threaded holes on top of center blocks.
 6. All dimensions ± 0.005 " unless otherwise noted.
 7. All surface finish in 64 microinches rms unless shown otherwise.
 8. Flatness and parallel tolerances ± 0.005 " unless otherwise noted.
